

ISO 27001- Information security Management System (ISMS) – is revised and published the latest ISO 27001:2022 (dt 25<sup>th</sup> October 2022) as the third edition- Information security, cybersecurity, and privacy protection — Information security management systems. There are no major changes in the requirements of clauses. The Key Changes in ISO 27001:2022 vs ISO 27001:2013 is given below.

### **Key Changes in ISO 27001:2022 vs ISO 27001:2013**

- Annex A references the controls in ISO/IEC 27002:2022, which includes the information on control title and control
- The notes of Clause 6.1.3 c) are revised editorially, including deleting the control objectives and using “information security control” to replace “control”;
- The wording of Clause 6.1.3 d) is re-organized to remove the potential ambiguity
- Compared with the old edition (ISO 27001:2013), the number of controls in ISO/IEC 27002:2022 decreases from 114 controls in 14 clauses to 93 controls in 4 clauses. For the controls in ISO/IEC 27002:2022, 11 controls are new, 24 controls are merged from the existing controls, and 58 controls are updated. Moreover, the control structure is revised, which introduces “attribute” and “purpose” for each control and no longer uses “objective” for a group of controls

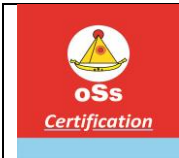

### **Validity of Certification of ISO 27001:2013**

ISO 27001:2013 certification will not be valid after 31/10/2025 (i.e 36 months from the Last publication month of ISO 27001:2022) (i.e 25<sup>th</sup> October 2022).
